Professional Summary

Flutter Developer with hands-on experience building scalable, responsive, and high-performance cross-platform applications. Proficient in Dart, Firebase, REST API integration, and modern state management solutions including Provider and GetX. Skilled in designing intuitive, user-centric UI/UX with a strong focus on performance optimization and clean architecture principles. Experienced in implementing structured backend integration, real-time data handling, and modular code practices. Committed to delivering reliable, production-ready applications while continuously enhancing skills through Agile methodologies and iterative development..

Professional Experience

Android / Flutter Developer Intern

SMEClabs, Kaloor, Ernakulam

May 2025 – Dec2025

- Developed Flutter-based mobile application modules using Dart, Firebase, and RESTful APIs.
- Designed login, dashboard, and task management screens using responsive UI/UX design.
- Worked with team members using Git/GitHub in an Agile workflow.
- Improved app performance by minimizing widget rebuilds and optimizing API handling.

Projects

Adidas E-Commerce App (Flutter, 2025)

- Created Adidas-themed shopping UI with product grid, product details, cart, and checkout flow.
- Integrated REST API for product data loading and dynamic category-based browsing.
- Used GetX for state management to ensure fast navigation, cart updates, and smooth interactions

Music Streaming App (Flutter, 2025)

- Developed music streaming app using Flutter and just audio.
- Executed play, pause, seek, shuffle, and repeat functions.
- Optimized audio buffering and app responsiveness for faster load times and improved user experience.

Instagram UI App (Flutter, 2025)

- Built Instagram-style UI with feed, stories, notifications, and profile screens in Flutter.
- Integrated smooth animations, transitions, and scroll effects for a native-like experience.
- Used Provider for real-time UI updates and efficient state management across app sections.

Snap Shop - E-Commerce App (Flutter, 2026)

- Built an e-commerce app with product listing, cart, and order features.
- Configured Firebase Authentication and Firestore-based order management system.
- Conceptualized modern UI with responsive layouts and optimized state management.

Personal Belongings Rental App (Flutter, 2026)

- Built a peer-to-peer rental platform enabling users to list, browse, and rent personal items.
- Executed Firebase Auth with Firestore-based cart and rental tracking.
- Structured scalable database architecture with Products collection and user-based cart subcollections.

Online Doctor Appointment and Clinic Management App (Flutter, 2026)

- Created an online appointment booking system with doctor listing, specialization filtering, and other features.
- Built clinic management features including billing, medical records, and department administration.
- Generated an admin panel for appointment monitoring and operational control.

Vigilant – Incident Reporting System (Flutter, 2026)

- Built a real-time incident reporting app with location and media support.
- Implemented structured report workflow including submission, status tracking, and resolution updates.
- Integrated push notifications for report acknowledgements and status changes.
- Devised modern glassmorphism UI with custom bottom navigation and smooth page transitions.
- Structured Firestore database for efficient incident storage, timestamp-based sorting, and live status updates.

Technical Skills

- Flutter, Dart
- Firebase (Authentication, Firestore)
- RESTful APIs, JSON, HTTP Integration
- State Management: Provider, GetX
- Tools Platforms: Git, Android Studio, VS Code
- UI/UX: Responsive Design, Glassmorphism, Neomorphism, Minimalistic, Material Design
- Basic Python (Scripting, Data Handling)
- HTML & CSS (Layout, Styling, Responsive Web UI)

Education

Bachelor of Computer Applications — Completed
Flutter Development Course — SMEClabs

Certifications

Flutter Development Certification — SMEClabs
